

ECORYS supports best INTERREG IVC project

17 November 2009 - ECORYS is proud to announce that all INTERREG IVC project proposals supported by ECORYS have been approved. Furthermore, one of these projects - the DeltaNet project - has received the highest score of all 481 INTERREG IVC project proposals (2nd call).

The Rijn Schelde Delta/ Province of East-Flanders (BE) has developed the interregional project 'DeltaNet' with partners from Belgium, Spain, Portugal, Poland, Romania, Germany and United Kingdom. In this project the partners will exchange experiences on the development of their delta areas as these areas are prone to conflicting interests of the harbours, coastal protection, nature and tourism.

ECORYS has provided support to the lead partner by (re)writing the application form, ensuring a good consistency of the application, quantifying a good set of indicators and checking the budget. ECORYS wants to congratulate the Rijn Schelde Delta/Province of East-Flanders and to wish them a succesful implementation of their interesting project!

For more information on their project you can visit: www.deltanet-net.eu or contact info@ecorysacademy.com
